Summary

I look for the connection between technology and people and I focus on that.

I have technological skills but I also know how to carry people along in the journey of building something:

It's important to allow people have a stake in whatever they are building. That is when their hearts can be invested. When they have ownership.

Experience

Full Stack Developer

KEYLA

Oct 2021 - Present (1 year +)

- I worked on upgrading Cravings website into a full E-commerce application
- I re-developed the company's website (www.keyla.ng) using React JS and Gatsby
- I replicated the UI Design for the food vendor applications' website called Cravings (www.cravingsng.com) and ensured mobile responsiveness and a great user experience using React JS and Material UI
- I developed an admin dashboard for a another food vendor application with total user and admin management using ReactJS, Material UI and React's Context API
- I created a brand website for Cravings Logistics
- I completed the backend of a food delivery app that has a full logistics feature using PostgreSQL, NodeJS and ExpressJS.

p. MERN Stack Developer

Punch Group

Nov 2021 - Mar 2022 (5 months)

- I worked with the development team to create a unique platform that would serve as the LinkedIn for people in the IT industry and also provide unique features that are relevant to people in this field.
- I also worked with different teams to create a client project that aims to revolutionize the idea of salesmanship. I got experience with tools like Apollo for GraphQL, TypeScript, React-Native-Web, NextJS, VideoJS and Recharts
- * I left for health reasons

Full Stack Developer

Composite Property Development

Feb 2021 - Dec 2021 (11 months)

I completed four main tasks in this role

- I rebranded the companies website and created User Interface Designs with Figma. Then I created the backend for the application using MySQL, NodeJs and ExpressJS
- My team and I created the frontend of a crowdfunding real estate application that would be used by the company with ReactJS, Material UI and Reacts' Context API

- My team and I concluded the company's staff portal and client dashboard to manage company's inventory, projects, staff, clients and contractors
- My team and I organized a training session for the staff of the company to train them on how to use the application we developed

Product Owner

The Chicken Universe

Oct 2019 - Jan 2021 (1 year 4 months)

I created this application to help connect buyers and sellers of chicken products together. As the only developer involved in the projects, I:

- Created the web application using React JS, EJS, NodeJS, Express JS, MongoDB, Sockets IO and React's Context API
- I hosted the web application using cloud hosting and was in charge of managing the SSH interactions
- I created the mobile application using React Native and hosted it on Amazon's AppStore

Supply Base Manager

KFC

Aug 2018 - Oct 2018 (3 months)

I took this job to learn about the principles of a long standing business. KFC has been in existence for over 69 years and I wanted to know why. I got to learn that a business is not built on passion but by following well defined principles and procedures. I was also learnt about integrity, character and was made to understand the necessity of discipline

* I left for my NYSC programme

Information Technology Support Technician

Bank of Industry Limited

Feb 2017 - Aug 2017 (7 months)

Prior to this role, I had worked in an internet café and was used to interacting with customers and addressing their needs but this role taught me about utilizing this skill in a corporate setup. I was taught problem solving patterns as I handled staff complaints that were related to technological devices and network infrastructure issues

Technical Support

Tynet Cafe

May 2011 - Jul 2011 (3 months)

This was my first role and as a young individual I was exposed to technical support skills and network administration in what is known as a cyber cafe. This was when I understood how the internet works and how to manage people in a network

Education

Covenant University

Bachelor of Science - BS, Computer Science

2014 - 2018

I was taught the basics, history and essence of computer science, software design and architecture and was awarded with First Class Honors
