PROFESSIONAL EXPERIENCE

Software Developer

Abbey Bank, Nigeria | Aug 2026 – Present

- Finacle Core Migration & Security: Spearheaded service migrations to Finacle and integrated Entrust authentication to bolster access control across core banking platforms.
- Digital Channel Optimization**:** Streamlined USSD menu flows, resolved character length bugs, and embedded post-action fee alerts to elevate user experience and transparency.
- Architecture & Queue Management**:** Deployed RabbitMQ asynchronous messaging for core service
- Enterprise Content Management**:** Configured file-type filtering and validation for core document uploads using Alfresco

Frontend Engineer

Rova (FCMB Group), Nigeria | Aug 2024 – May 2026

- Developed enterprise corporate banking features supporting bulk payments, account management, transaction processing, and multi–step financial approval workflows across Nigeria and the UK.
- Built reusable React and TypeScript components and frontend architectures to improve maintainability, consistency, and development efficiency across banking modules.
- Integrated RESTful APIs and backend services for financial transactions, authentication, account operations, and enterprise customer workflows.
- Implemented frontend functionality for secure banking operations, including transaction validation, maker–checker approvals, and role–based user workflows.

CTO and Frontend Engineer

Kanaga Technologies, Nigeria | Aug 2023 – Jul 2024

- Led the technical development of A1Quest, an educational platform designed to improve access to mathematics learning.
- Defined frontend architecture, technical priorities, and product implementation plans while coordinating engineering and product activities.
- Built React and TypeScript interfaces, reusable UI components, and integrations with backend services and administrative systems.
- Coordinated testing, deployment, and software delivery activities across the product lifecycle.
- Managed technical decision–making and contributed to product strategy, feature prioritization, and engineering delivery.

Mobile Engineer

Sterling Bank PLC, Nigeria | Feb 2022 – Jun 2023

- Implemented fintech features supporting Nigerians in the diaspora with secure access to banking operations, account management services, and digital financial workflows.
- Enhanced mobile applications with secure payment systems, identity verification workflows, transaction capabilities, and card management features.

- Contributed to application reliability, observability, debugging, troubleshooting, production support, and mobile performance optimization initiatives.
- Integrated backend services and secure authentication workflows supporting enterprise banking operations and customer–facing financial services.

Full–Stack Developer

Composite Property Development, Nigeria | Feb 2021 – Dec 2021

- Developed a real estate crowdfunding platform enabling users to invest in construction and property development opportunities.
- Built frontend and backend application features using React, Node.js, REST APIs, and database–driven architectures supporting customer and operational workflows.
- Improved company digital platforms, application usability, and customer experience through redesigned web systems and optimized workflows.

CEO and Full–Stack Engineer

The Chicken Universe, Nigeria | Oct 2019 – Jan 2021

- Founded and developed a poultry marketplace connecting suppliers, vendors, distributors, and customers, growing the platform to over 1,000 registered users.
- Developed backend infrastructure, APIs, real–time systems, and cloud–based application features using Node.js and modern web technologies.
- Managed the full product lifecycle, including architecture, development, deployment, monitoring, maintenance, and operational support.
- Implemented authentication systems, payment workflows, service integrations, and scalable platform features supporting day–to–day business operations.
- Led product strategy, customer acquisition initiatives, market research, and business operations.

CERTIFICATIONS & PROFESSIONAL QUALIFICATIONS

- Certified Six Sigma Yellow Belt – Council for Six Sigma Certification (C.S.S.C)
- Master of Business Administration (MBA) – University of East London (in progress)
- ACIB — Chartered Institute of Bankers of Nigeria (in progress)
- B.Sc. Computer Science (First Class Honours) – Covenant University, 2018
- Diploma in Leadership Development – Covenant University
- Dante Audinate Certification Level 1 and 2 – Audinate
- Organizational Leadership – University of California, Riverside Extension
- Management Theories and Philosophies – Unicaf University
- AWS Technical Essentials – Amazon Web Services

TECHNICAL SKILLS

- Frontend: JavaScript, TypeScript, React, React Native, Vue.js, Nuxt.js, HTML, CSS, Tailwind CSS
- Backend: Node.js, Python, FastAPI, REST APIs
- Machine Learning: Pytorch, LangChain
- Databases & Messaging: PostgreSQL, Redis, RabbitMQ
- Cloud & DevOps: AWS, Azure, Docker, Linux, Git, CI/CD
- Testing: Jest, Vitest
- Enterprise & Integration: WSO2, API integrations, authentication systems, enterprise banking workflows
